

Skyview High School

The mission of Skyview High School is to provide students with the necessary knowledge and skills to be college, career, and life ready. By providing an innovative educational environment, students are authentically engaged in powerful learning opportunities through meaningful work and real-life research and projects. Their goal is to ensure that every student graduates with the knowledge and skills they need to achieve their hopes, dreams and potential. To that end, they have developed rigorous and robust curricular offerings and an outstanding and extensive extracurricular program.

The school is home to the Science Math and Technology Magnet and enjoys the support and rigor that comes from working with community partners who are dedicated to STEM education. Skyview offers Video Game Programming, Robotics, and a four-year pre-engineering curriculum, Project Lead the Way. Community mentors play an active role in their magnet, ensuring real life application. Additionally, students can access 19 different Advanced Placement Courses, College in the High School, and five years of Spanish, French, German and American Sign Language. AVID supports college readiness for all students. Supporting these curricular offerings are 23 clubs that allow students to further apply their learning and push their thinking. The school has won the state championship in Knowledge Bowl in 2010 and Skyview has been the US Department of Energy National Science Bowl Regional winning team twice.

The performing arts thrive at Skyview High School: their bands, choirs and orchestra regularly compete at the national level. Our athletic program stresses the wellness of the whole student. In addition to having 10 teams compete at the state level this year, SHS regularly has state academic championship teams. Finally, students can access 56 different classes in their active Career and Technical Education Program.

As one parent put it, "Skyview is a wonderful place. It has provided our kids (and our family) with a phenomenal education, a springboard and fully-stocked tool kit for success in college and beyond – a treasure chest full of friendships, memories and experiences to last a lifetime."
