

Technology Training & Integration

PD Resources Proven to Impact Student Achievement

Research shows students' annual achievement in math and reading doubles* when taught by teachers who utilize Atomic Learning's online technology integration-focused professional development resources, including those within Atomic Learning's signature solution—Atomic Integrate.

Atomic Integrate includes:

- Video tutorials on 250+ software applications and tools
- Training Spotlights on highly-relevant ed tech topics
- Big-picture Workshops on Avoiding Plagiarism, Effective Presentations, The Social & Interactive Web, and more
- Tech Integration Projects for seamless integration
- Focused resources on implementing a mobile initiative
- Lessons addressing the technology components of Common Core State Standards
- Certificates of Completion to track training commitment
- ISTE® NETS and technology skills assessments to measure individuals' ability to use and apply technology
- Access to all training resources through iPad® app
- 24/7 online access for faculty, staff, students and parents
- Reports and tools to assign training and monitor progress
- Integration tools to streamline access
- On-going implementation support
- Option to upload training with upgrade to Atomic Integrate+

With Atomic Integrate, it's never been easier to train on new technology and encourage classroom integration. It's efficient, effective, affordable—and available to all faculty, staff, students and parents from school or home.

Visit www.AtomicLearning.com/integrate to learn more about the resources and tools included in the Atomic Integrate solution, and request more information on how it can work for your school or district's initiatives.
