

**The Race Equity Tool Objective:** To support the PSESD's goals of eliminating racial inequity through creating an Antiracist Multicultural Organization and closing the opportunity gap, we will incorporate a racial equity analysis when creating and/or revising agency policy. The following six best practices guide the user through a process of collaborating with communities of color to ensure all agency policies are in alignment with agency goals.

We Agree:

- That in order to eliminate racial inequities, it is essential that race be clearly called out and institutional and structural racism be addressed within our own organization as well as in the broader systems with which we interact.
- That the importance of training and skill building within our organization, departments, and internal and external programs is paramount. Increasing the number of trained and skilled employees, including leadership, staff, board members, etc, will not only help to make improvements supporting racial equity, but will also help to develop an anti-racist culture within our organization.
- To explore and develop a shared understanding relating to racial equity, and we also recognize that we and our external partners are all at different places as individuals, programs, and departments. We are committed to move forward with a focus that is intentional and strategic within our organization and our external partners. We will openly share challenges, successes and lessons learned to help move the sum of our race equity work forward.
- To have collective buy-in to racial equity best practices, we will each take responsibility for using the racial equity tool.
- That how the racial equity tool is implemented and used will differ from program to program, department to department and across our organization. Accountability for implementation and use within our own organization and to our respective communities (children, students, families and schools) will be essential.
- To approach racial equity analyses from an evaluative / continuous improvement perspective, as opposed to a **check list**. We will seek to strengthen programs, policies and procedures until racial inequities are eliminated.
- That if the strategy, practice, policy, or procedure works for our most vulnerable communities, it works for everyone. The reverse however, is not true.
- That we will not let the perceived barriers such as (time, agendas, schedules, etc) prevent us from interrupting patterns of racial inequity.
- **That use of the tool may not be linear. For example, users may want to start with question 3 in order to ensure they have a clear understanding of the community conditions that may be impacted by the implementation of this policy.**
- **That after use of the tool, changes in policy may not be needed. However, the procedures associated with that policy may need to be created or enhanced to ensure racial equity can be achieved.**
